THIS USER GUIDE WAS CREATED USING MADCAP FLARE.

What's New in This Version

Following are new features included in this version of MovieSync.

Ribbons

As an alternative to the classic menus and global toolbars available in previous versions, you can use a more modern ribbon layout that follows the example of newer Microsoft Office products. The ribbon layout consists of a File drop-down with common tasks. This is followed by the Home, Window, and Help ribbons.

ЕХАМР	LE			
Here is the	user interface	e with the ribbon layout d	isplayed.

lere is the File	Window ribbo	object on. hdow Help	Quick Preview	View
Here is the File	Window ribbo Home Win Close All Documents •	Object	Quick Preview Quick Preview Reload Layout Save Layout V Auto-save L	out ut ayout

And here is the Help ribbon. Notice that it has different options.							
File Home	Window Help						
Dynamic Help	Locate in TOC Auto-Sync TOC Contents	Index Search Favorites Glossary	PDF Guides	Help Community	Activate Product Check for Update Deactivate Product About Register Product Report a Bug		
Topics	Contents	Panes	Tutorials	Community	Product		
ropics	contents	- Tanco	- Tatonais	connunty	House		

Following are some characteristics of the new ribbons.

• Switch views By default ribbons are used when you install and launch MovieSync for the first time. However, you can use the Options dialog to switch back to the classic menu and global toolbar layout (i.e., tool strip).

🍝 Options		1	? x
General Interface	Menu Style Ribbon Tool Strip Theme Active Theme: Classic	On the Interface tab in the Options dialog, you can use these options to switch between the ribbon layout and the classic menu/toolbarlayout	
		ОК	ancel

Minimize You can minimize the ribbons so that you only see the top portion of the ribbons until you select an option.

To do this, right-click anywhere in a ribbon and select Minimize the Ribbon from the context menu.

Icons/text Ribbons consist of icons and text, which let you perform various tasks. Larger icons are shown for the most common tasks.

Sections Ribbons are split into sections to make it easier to locate the options on them. For example, the Home ribbon contains the following sections: Clipboard, Object, Quick Preview, and View.

Reducing application window size When you reduce the size of the entire application window, the ribbons are also reduced in a way that lets you continue to access hidden options by clicking on the section name.

EXAMPLE

Let's say you have the application window maximized, and this is what you see when opening the Home ribbon.

File	Home	Window Help		
	🔀 Cut	🖑 Hand Mode 🛭 🕼 🥐 🥕 🥅 🔲 🔲 🐂	Movie Next 5 Frames	💽 Start Page 👖 Frames Window
	🖹 Сору	🔖 Select Mode 😑 🗔 📉 🐼 🥌 🖬 🙀 Reset Trajectory	This Frame Next 10 Frames	Messages Properties Window
Paste	🗙 Delete	📄 Select All 🛛 🤤 🚺 💭 🛑 💭 🔝	Start at this Frame	Status Bar
Clip	pboard	Object	Quick Preview	View

If you reduce the size of the application window, the ribbon may shrink along with it. You can still access all of the options. Some icons are simply smaller, and others are accessible from section drop-downs.

Color Theme

You can use the Interface tab on the Options dialog to choose a color scheme for the interface.

😤 Options		2 X
General Interface	Menu Style Ribbon Tool Strip Theme Active Theme: Classic	You can select the theme from this drop-down field.
		OK Cancel

Quick Access Toolbar

You can create a Quick Access toolbar at the top of the workspace to display options that you use most often. When options are added to the Quick Access toolbar, they are easily accessible, regardless of the ribbon that is open.

By default the Save, Save All, Undo, and Redo buttons are already added to the toolbar. However, you can add others as well.

To add an option, right-click on it in the ribbon and select Add to Quick Access Toolbar from the context menu.

6

To remove an option, right-click on it in the Quick Access toolbar and select **Remove from Quick Access Toolbar** from the context menu.

Note: You cannot remove the default Save, Save All, Undo, and Redo options from the Quick Access toolbar.

You can also use the context menu to move the Quick Access toolbar below or above the ribbon.

KadCap M File H Window Da Open W	The Quick Acce toolbar is now be the ribbon.	SS low Layout	Save Layout + Wind	Reload L Reset La Auto-sav ow Layout	ayou yout ve La
- 🖬 🔐 🦛	🍝 🗊 🔹				
Frames				▼ ₽ ×	
Old 🐣 🎽	$\bullet + + +$	New 👂 🙊	1	÷	

Note: The Quick Access toolbar is available only if you are using the ribbon layout, as opposed to the classic tool strip layout.

Window Pane Layouts/Tab Options

You will probably notice immediately that the overall look of the window panes has changed. In addition, you can now choose how to view window panes in the workspace.

- Accordion tabs
- Standard tabs on top
- Standard tabs on bottom

To switch between tabs, click in the title bar of the window pane or editor and select a view.

APPENDIX PDF Guides

You can download any of the following PDF guides from the online Help. Just open the topic called "PDF Guides" and click any of the download links. You can also scan any of the following QR codes to open the PDF on your mobile device.
